

metal prints

One word: luminescence. Metal Prints from Diversified Lab infuse dyes directly into specially coated aluminum panels creating brilliant images that shine with radiant color. The coating acts as a durable barrier against dirt, scratches and harmful UV rays, thus eliminating the need for protective glass or framing. The surface of our metal prints beam with such vibrant color and visual depth that they appear nearly 3D.

- Hanging Options: Beehive Hangar, Metal Easel, Aluminum Shadow Mount, 1/2" Float Block
- Corner options: Rounded or Scalloped

size	price
