

thin wraps

Thin wraps are photographic or canvas prints wrapped around masonite. The prints, either lustre photographic or fine art canvas, are laminated and padding is placed in between the masonite and print to give it a raised, elegant look and feel. The back is finished with black paper and comes with a 3/4" mount block, which is ready to hang, or without a mount block for displaying on an easel. Lustre prints come with matte laminate and canvas with satin laminate.

- Thin Wraps come with black backing paper
- Padding is inserted between the masonite and print to add depth
- Qualifies for free shipping
- Color correction available
- Please remember that extra space is needed around the image for wrapping. Add 1" to each side, for a total of 2", for the final image size. e.g. An 8x10 would be submitted as a 10x12.
